

## Announcements

|  |       |
|--|-------|
| - Inside PAGES                         | 2     |
| - New on the PAGES bookshelf           | 31    |
| - PAGES calendar                       | 42    |
| - A taste of the YSM proceedings issue | 43    |
| - National PAGES                       | 50-51 |

## Special Section: Peatlands: Paleoenvironments and Carbon Dynamics

### Editorial:

|  |   |
|--|---|
| - Peatlands: Paleoenvironments and Carbon Dynamics | 3 |
|--|---|

### Science Highlights:

|   |    |
|---|----|
| - Peatland archives of late-Holocene climate change in northern Europe<br><i>F.M. Chambers, J.R.G. Daniell and ACCROTELM Members</i>  | 4  |
| - Using peatland archives to test paleoclimate hypotheses<br><i>R.K. Booth, S.T. Jackson and M. Notaro</i>  | 6  |
| - Peatlands as a model system for exploring and reconciling chronologies<br><i>M. Blaauw, J.A. Christen and D. Mauquoy</i>  | 9  |
| - Peatland records of solar activity<br><i>B. van Geel and D. Mauquoy</i>   | 11 |
| - A multi-proxy high-resolution approach to reconstructing environmental change<br><i>M. Lamentowicz, W.O. van der Knaap, J.F.N. van Leeuwen, S. Hangartner, E.A.D. Mitchell, T. Goslar, W. Tinner and C. Kamenik</i> | 13 |
| - Stable isotopes and organic geochemistry in peat<br><i>E.L. McClymont, E. Pendall and J. Nichols</i>  | 15 |
| - Peat cellulose isotopes as indicators of Asian monsoon variability<br><i>B. Hong, M. Uchida, X.T. Leng and Y.T. Hong</i>  | 18 |
| - Peat as an archive of atmospheric pollution and environmental change<br><i>F. De Vleeschouwer, G. Le Roux and W. Shotyk</i>   | 20 |
| - The northern peatland carbon pool and the Holocene carbon cycle<br><i>D.W. Beilman, G.M. MacDonald and Z. Yu</i>  | 22 |
| - Past and present carbon accumulation and loss in Southeast Asian peatlands<br><i>S. Page, R. Wüst and C. Banks</i>  | 25 |
| - Inception, history and development of peatlands in the Amazon Basin<br><i>O. Lähdeenoja and K.H. Roucoux</i>  | 27 |
| - Peatland exchanges of CO <sub>2</sub> and CH <sub>4</sub> : The importance of permafrost<br><i>T.R. Christensen, M. Mastepanov, M. Johansson and D. Charman</i>   | 29 |

## Science Highlights: Open Section

|   |    |
|---|----|
| - El Niño/Southern Oscillation and SST changes over the last 1.2 ka<br><i>J.L. Conroy, J.T. Overpeck and J.E. Cole</i>                              | 32 |
| - Modes of eastern equatorial Pacific thermocline variability: Implications for ENSO<br><i>G. Leduc, L. Vidal, O. Cartapanis and E. Bard</i>        | 34 |
| - Southern Hemisphere intermediate water formation and the bi-polar seesaw<br><i>S.J.A. Jung, D. Kroon, G. Ganssen, F. Peeters and R. Ganeshram</i> | 36 |

## Workshop Reports

|  |    |
|--|----|
| - The 2 <sup>nd</sup> PAGES past interglacials (PIGS) workshop                     | 38 |
| - Understanding future sea level rise: The challenges of dating past interglacials | 39 |
| - High- to mid-latitude northern atmospheric circulation changes                   | 40 |
| - The West African Quaternary Research Association inaugural workshop              | 41 |
